

# FORESPURE

Creative Color Board  
COLOR MAKES MDF WORLD PERFECT!

## THE BEST IN ECO-FRIENDLY, BEST IN QUALITY!

FORESPURE NAF(No Added Formaldehyde) MDF is the most eco-friendly product manufactured using a process whereby no formaldehyde resin is added. The FORESPURE NAF MDF is manufactured based on natural vegetable adhesive from soy. Its ultra low formaldehyde emissions are no greater than those released by a tree in nature. FORESPURE NAF is ideal for all interior application in multiuse facility which is sensitive of indoor air quality.

Creating with Nature in Mind No Added Formaldehyde

- ✓ FSC® Certified

## PRICE VARIATION WITH FUNCTIONALITY

# FORESCO MR

Creative Color Board  
COLOR MAKES MDF WORLD PERFECT!

## INCREASE DURABILITY WITH STRONG RESISTANCE TO MOISTURE

FORESCO MR is high moisture resistance which allows high dimensional stability compared to normal product. Due to its high moisture resistance, it is suitable for various application in humid environment.

# FORESCO FR

## ENHANCE SAFETY WITH FLAME RETARDANT TREATMENT

FORESCO FR is flame retardant product due to combination of FORESCO's flame retardant and resin technology. It can be used with other fire retardant surface materials and it is suitable interior product for Fire service act and building regulation. FORESCO FR is superior flame retardant product by impregnating the fibers with halogen-free flame retardant. It is a wood based panel that passively inhibits the spread of fire and smoke. In case of fire, the properties of FR board enables safer evacuation.

Flame Retardant

\*The formaldehyde emission of FORESCOLOR is classified E0 grade according to Korean Standard.

ADD MORE COLOR TO YOUR LIFE

Advantage

Moisture Resistant

- FORESCOLOR has high moisture resistance due to high melamine content of resin used.
- It can be used where humidity is a concern such as kitchens, bathrooms with the correct finishing.

Non Toxic

- The formaldehyde emission of FORESCOLOR is classified E0 grade.
- Non toxic and excellent color-fastness due to use of special resin and organic dye.

Color Throughout

- Consistent Color distribution from surface to all the way through.

Tool Friendly

- Due to its excellent density profile and high melamine content of resin used, there is little or no sanding required after machining.

On request

Flame Retardant

- Flame Retardant is also available.

No Added Formaldehyde

- FORESCOLOR is also available with NAF product which No formaldehyde resin is used during the manufacturing process. (available with specific color)
