1 product –
3 functions

Magnetic Board 8202 White glossy with grid points

Grid points – Small light grey points in a grid of abt. 5 cms serve as orientation lines when writing on the surface. This is particularly helpful for spreadsheets and columns of figures.

Board marker – Suitable for use as marker board and dry-wipeable. A perfect cleaning result will only be obtained after the ink of the board marker is completely dry.

Magnetic effect – High holding power due to an iron foil which is embedded in the laminate. Thus, large-format documents, e.g., plans, posters and other objects can be easily fixed with magnets and removed again without leaving traces.

Application fields – The functions of the product are ideal for use in conference rooms, design and architectural offices, education institutions like schools, universities etc.
