

Maintenance kit - parquet mat lacquer

THE MAINTENANCE KIT CONSISTS OF:

1 liter Bona Wood Floor Cleaner | 1 liter Bona Wood Floor Polish

1. TAKE SOME PRECAUTIONS

1. Clean the floor regularly with a vacuum cleaner or soft broom; particles of dirt and grit that are left behind can damage the surface of the floor.
2. Remove stains immediately with a well-wrung cloth. Worn-in stains are difficult to remove.
3. Never use too much water when mopping; instead use a well-wrung floor cloth.
4. Never clean the floor with pure water; always use a product for the maintenance of oiled parquet.
5. Do not use traditional cleaning products.
6. Place doormats at exterior doors.
7. Place beige, felt floor protectors under chair and table legs; do not use coloured floor protectors!
8. Avoid wearing damaged or worn stiletto heels.
9. Place a protective mat under chairs with wheels.
10. Place a protective dish under flowerpots.
11. Do not drag heavy objects across the floor; lift them up to avoid scratches.
12. Be careful with open windows - a rain shower can damage the floor.

POINTS OF SPECIAL INTEREST

- Never use maintenance products that contain wax; these will form an unwanted oily layer on the floor. This layer of wax will result in adhesion problems the next time you treat the floor.
- Do not wait until the varnish layer loses its shine. We recommend regularly applying a new layer of polish with Bona Wood Floor Polish Mat.

2. FIRST TREATMENT AFTER INSTALLATION

Start the regular maintenance programme immediately after installation, Bona Wood Floor Cleaner.

3. REGULAR CLEANING WITH BONA WOOD FLOOR CLEANER

For the regular cleaning of your UV mat floor you can mop with a little water. If you want to use a cleaning product, we advise Bona Wood Floor Cleaner. This product is suited for the cleaning of lacquered wooden surfaces.

1. Vacuum, dry mop or sweep to remove any loose dirt or grit. If you vacuum, use a soft brush attachment.
2. Mist the product in small quantities on the surface. Use a mop to spread the product and cover the surface. Always mop lengthwise of the wood.
3. Leave the floor to dry for a few minutes after the application of the product.

4. ANNUAL CLEANING WITH BONA WOOD FLOOR POLISH

Bona Wood Floor Polish is a ready-to-use waterborne maintenance product specifically designed for use on lacquered wooden surfaces and therefore reinforced with durable polyurethane. It gives an extra protection against wear and moisture. The surface remains beautiful and keeps its gloss longer.

1. Vacuum, dry mop or sweep to remove any loose dirt or grit. If you vacuum, use a soft brush attachment.
2. Apply the polish with small drops on the floor. The product doesn't need to be diluted, with 1 litre you can treat 50 m².
3. Apply the Bona Polish equally over the floor surface with a sponge or mop. Don't take the application pad of the floor, bubbles can cause an irregular shine. The best is to start on one side of the room and work gradually to the other side.
4. Leave the floor to dry for 2-4 hours. Clean the tools with water directly after use.
